**Course Description**

While Creative Placemaking is a relatively new term, it’s practice is decades old, particularly in Wisconsin. In alignment with the Wisconsin Idea, early UW Extension agents, artists, and faculty conducted research and practiced community development throughout many of Wisconsin’s
small rural communities. Our course will see us exploring this rich history, definitions, and current impacts of creative placemaking (also known as arts-based community development) in Wisconsin, the United States, and globally. The class will participate in active learning, which means there will be a live examination of creative placemaking models, best practices and failures, evaluation, and measures of success with guest artists and community practitioners engaged in this work across the state of Wisconsin and eastern Minnesota. Class will be delivered in day-long increments, through a workshop style methodology where student teams will conduct their study and practice of creative placemaking techniques.

**Likely Audience for this course/learning opportunity:**
- Undergraduate and graduate students involved in or interested in arts management, community development, entrepreneurship, urban/rural planning, and nonprofit/agency management
- Planners, economic development staff, arts, and placemaking practitioners

**Course Learning Outcomes**
At the end of the course, students should be able to:
- Create and work within a dynamic and highly functional team;
- Understand and be able to articulate the theoretical and practical implications of creative placemaking on community revitalization efforts;
- Understand and articulate the importance of the arts and culture in both making and keeping a sense of place and pride in community development (placemaking vs. placekeeping) from the perspective of multi-sector frameworks;
- Convey complex ideas around models, good practices, and program evaluation.
- Develop a network of individuals and organizations that will be helpful in continuing your exploration and/or practice of creative placemaking
